GIANT EGGLESS MOLTEN-CHOCOLATE COOKIE SUNDAE

The Curly Chef • Detailed, reproducible pastry recipe • Makes 4 large cookies

Concept: A thick, chewy dark-chocolate cookie filled with milk-chocolate ganache, served warm with vanilla ice cream, chocolate sauce and colourful sprinkles.

Recipe style: Eggless, home-kitchen friendly, with professional pastry techniques and clear checkpoints.

Yield: 4 oversized stuffed cookies (about 130–150 g each before baking) • **Serving:** 1 cookie per sundae • **Oven:** 175°C conventional / 165°C fan

CONTENTS

1. Equipment & preparation
2. Milk-chocolate ganache filling
3. Eggless dark-chocolate cookie dough
4. Vanilla ice cream
5. Chocolate sauce & finishing
6. Assembly, troubleshooting & storage

1. Equipment & preparation

Digital scale, mixing bowls, heatproof bowl, small saucepan or microwave, spatula, whisk, baking tray, baking parchment, broad metal spatula, ice-cream scoop, dessert plate, small spoon and dessert spoon. A refrigerator and freezer are needed for chilling and ice cream.

Before starting: Line a tray with baking parchment. Chop the chocolates evenly. Bring the butter to cool room temperature: it should yield when pressed but must not be oily or melted. Preheat the oven only when the shaped cookies are ready to bake.

2. Milk-chocolate ganache filling

Ingredient	Weight	Notes
Milk couverture chocolate, finely chopped	**120 g**	Use good-quality milk chocolate; couverture gives a smooth filling.
Heavy cream (about 30–35% fat)	**20 g**	Heat until steaming; do not boil vigorously.
Unsalted butter	**5 g**	Softened; adds a little richness.
Fine salt	**0.3 g**	A small pinch balances sweetness.

Method

1. Place the chopped milk chocolate in a dry heatproof bowl.
2. Heat the cream until steaming, then pour it over the chocolate. Let stand for 60–90 seconds.
3. Stir slowly from the centre outward until smooth. If pieces remain, warm in 5-second microwave bursts or briefly over a warm water bath.
4. Stir in the butter and salt until glossy and uniform. Avoid whisking in air.
5. Cover and chill until firm enough to portion. Divide into 4 compact portions, roughly 30–35 g each. Chill again until firm and easy to handle.

Checkpoint: The filling should hold its shape when lifted with a spoon. It should not be runny. If it is still soft, chill longer rather than adding extra chocolate at random.

3. Eggless dark-chocolate cookie dough

Ingredient	Weight	Notes
Plain flour (maida)	**180 g**	Provides structure.
Unsweetened cocoa powder	**30 g**	Use natural or Dutch-process cocoa; colour and flavour vary.
Cornflour (cornstarch)	**10 g**	Helps tenderness.
Baking soda	**2 g**	Supports spread and browning.
Baking powder	**2 g**	Adds a little lift.
Fine salt	**2 g**	Balances sweetness.
Unsalted butter, softened	**100 g**	Not melted.
Dark brown sugar	**100 g**	Adds moisture and chew.
Caster sugar	**45 g**	Supports crisp edges.
Plain unsweetened yogurt	**30 g**	Egg replacement; use thick yogurt, not watery.
Vanilla extract	**5 g**	About 1 tsp.
Dark chocolate chunks	**60 g**	Plus a few extra chunks for the outside if desired.

Ingredient	Weight	Notes
Milk, only if needed	**5–10 g**	Add only if dough is unusually dry and crumbly.

Method

1. In a bowl, whisk together flour, cocoa, cornflour, baking soda, baking powder and salt until evenly mixed. Set aside.
2. In another bowl, press and mix softened butter with both sugars using a sturdy spatula for 1–2 minutes. Aim for a cohesive, slightly grainy paste—not pale, fluffy cake batter.
3. Mix in the yogurt and vanilla until mostly combined. A slight uneven look is fine.
4. Add the dry ingredients in two additions. Fold until only a few dry streaks remain.
5. Fold in the dark chocolate chunks. Stop mixing as soon as the dough comes together. If it is genuinely crumbly and will not hold when pressed, add milk 1 tsp at a time; do not add it automatically.
6. Cover and chill for 20–30 minutes so the dough is easier to shape.

Texture checkpoint: The dough should be thick and scoopable, hold its shape, and show visible chocolate chunks. It should not be pourable or greasy.

4. Stuff, shape and bake the giant cookies

Shaping

1. Divide the dough into 4 equal portions. For oversized bakery cookies, each portion should be generous; keep the ganache portion slightly smaller than the dough portion.
2. Flatten one dough portion into a thick disc in your palm. Keep the centre a little thicker than the edges if the dough is fragile.
3. Place one chilled ganache portion in the centre. Bring the dough edges up around it and pinch the seam completely closed. No filling should remain exposed.
4. Roll gently into a thick ball. Do not flatten it into a thin cookie. Place seam-side down on the lined tray, leaving at least 7–8 cm between cookies.
5. Chill the shaped balls for 20–30 minutes. This helps the cookies keep a thicker profile.

Baking

1. Preheat a conventional oven to 175°C (or fan oven to 165°C). Oven temperatures vary; an oven thermometer is useful.
2. Bake from chilled for approximately 12–16 minutes. Begin checking at 12 minutes. The edges should look set, while the centres remain soft and slightly under-set. Do not wait for the entire surface to look dry.
3. Leave the cookies on the tray for 10–15 minutes. They are fragile when hot and continue setting as they cool.
4. For the sundae, serve one cookie while still warm—not piping hot—so the ice cream softens gradually without immediately collapsing.

Doneness cue: Look for set edges, a slightly puffed centre and a surface that has lost its raw, wet shine. If the cookie is very pale and doughy all over, give it another 1–2 minutes and check again.

5. Vanilla ice cream

Ingredient	Weight	Notes
Whole milk	**350 g**	Use full-fat milk for better body.
Heavy cream (30–35% fat)	**250 g**	Adds richness.
White sugar	**85 g**	Adjust only after testing; sweetness is affected by the chocolate served with it.
Skim milk powder	**25 g**	Improves body and reduces iciness.
Glucose syrup	**25 g**	Helps scoopability; do not substitute dry glucose powder by equal weight.
Vanilla bean paste	**5 g**	Or use vanilla extract to taste.
Fine salt	**1 g**	Balances flavour.
Xanthan gum (optional)	**0.5 g**	Use a precise scale; too much can feel gummy.

Method

1. In a bowl, thoroughly mix the sugar, skim milk powder and optional xanthan gum so the powder disperses evenly.
2. In a saucepan, combine milk, cream and glucose syrup. Warm over medium-low heat, stirring.
3. Whisk in the dry mixture gradually. Heat while stirring to 82–85°C, holding briefly at that range if your process allows. Do not boil vigorously.
4. Remove from heat and mix in vanilla and salt. Cool promptly, then cover and refrigerate until fully cold—ideally 4 hours or overnight.
5. Churn in an ice-cream machine according to its instructions until it reaches a thick soft-serve consistency. Transfer to a covered container and harden in the freezer for at least 4 hours.
6. If you do not have an ice-cream machine, freeze in a shallow container and whisk or blend thoroughly every 30–45 minutes for the first 3–4 hours. This is a workaround; the texture will usually be less smooth than churned ice cream.

6. Chocolate sauce & finishing

Chocolate sauce ingredients

Ingredient	Weight	Notes
Dark couverture chocolate (55–65%), chopped	**100 g**	Use a balanced dark chocolate.
Heavy cream	**100 g**	Heat until steaming.
Unsalted butter	**10 g**	For a silky finish.
Glucose syrup (optional)	**10 g**	Adds gloss and helps keep the sauce smooth.
Fine salt	**0.5 g**	A small pinch.

Sauce method: Put the chopped chocolate in a heatproof bowl. Heat the cream until steaming and pour over the chocolate. Wait 1 minute, then stir from the centre outward until smooth. Stir in butter, optional glucose and salt. Let cool until warm and pourable. If it thickens too much, gently rewarm; do not boil.

Finishing ingredients

- 4 scoops vanilla ice cream
- 4 giant stuffed chocolate cookies, freshly baked and still warm
- Warm chocolate sauce, as needed
- A small pinch of colourful confectionery sprinkles per serving

Assembly — one serving

1. Place one warm cookie in the centre of a dark dessert plate. Use a broad metal spatula if it is too soft to lift safely.
2. Place one generous scoop of vanilla ice cream directly on top of the cookie. The ice cream should sit visibly on the cookie, not beside it.
3. Drizzle warm chocolate sauce over the ice cream using a spoon. Let a few ribbons run naturally onto the cookie.
4. Sprinkle a small amount of colourful sprinkles over the top.
5. Serve immediately. For the molten-centre reveal, cut or scoop into the cookie at the table. The chilled ganache will soften in the hot cookie, but it may be creamy rather than fully liquid depending on baking and serving temperature.

Professional presentation tip: Keep the plate relatively uncluttered. Use a thick cookie, one clear scoop of ice cream and a controlled drizzle. A small amount of sauce is more attractive than covering the entire dessert.

Troubleshooting

Cookie spreads too much: Chill shaped dough longer; check butter was softened, not melted; verify oven temperature.
Ganache leaks: Chill filling until firm, use enough dough around it, and pinch the seam completely closed.
Cookie is dry or hard: Reduce bake time slightly next batch; remove when edges are set but centre is still soft.
Cookie is raw throughout: Bake 1–2 minutes longer and let it rest on the hot tray; check oven temperature.
Ice cream melts too quickly: Chill the plate and serve the cookie warm rather than extremely hot. Scoop the ice cream just before serving.
Sauce is too thick: Rewarm gently or whisk in a little warm cream, a few grams at a time.

Storage & food safety

Store unbaked stuffed cookie dough balls covered in the refrigerator for up to 24 hours, or freeze them on a tray and then transfer to an airtight container. Bake from chilled; frozen dough may need extra time. Store baked cookies in an airtight container for 2–3 days at room temperature, though they are best freshly baked. Refrigerate leftover ice cream promptly and avoid repeatedly thawing and refreezing it. Keep dairy-based ganache and ice cream refrigerated when not in use.

Final checklist

✓ Ganache portions are firm before stuffing.
✓ Every seam is completely sealed.

✓ **Cookies are large and thick, not small or flattened.**
✓ **Cookie centres remain soft after baking.**
✓ **Assemble just before serving: warm cookie → vanilla ice cream → chocolate sauce → sprinkles.**

THE CURLY CHEF • Eggless baking, crafted with care.
